

JANMEET SINGH MAKKAR

AI Product Manager

makkar.janmeet@gmail.com · +91-7307710111 · linkedin.com/in/janmeet-s-makkar · Gurugram, India

PROFILE

Founding AI PM shipping production LLM agent systems end to end: agentic workflow design, retrieval and knowledge-graph grounding, prompt and context architecture, inference cost/latency optimisation, and evals. **IIT Ropar** CSE, with prior 0→1 consumer and monetization ownership at Zomato and Blinkit. Technical enough to own architecture trade-offs with engineering; commercially fluent enough to defend them.

EXPERIENCE

Nugget (Eternal Ltd.) | Founding Product Manager, AI

Dec 2025 – Present · India

- Own **end-to-end product strategy for Nugget's enterprise AI agent platform** (voice-first), a new Line of Business incubated within Eternal: agent orchestration, prompt and context architecture, retrieval and knowledge layer, inference infrastructure, evals, and analytics, driving 0→1 decisions across the full stack.
- Cut **per-minute production cost of the entire voice stack by 76%** via comparative simulation experiments benchmarking model choice, STT/TTS vendors, and pipeline configurations against cost-latency trade-offs **at high concurrency at production scale**.
- Own **architecture-level technical evaluations**: cascaded VAD→STT→LLM→TTS pipelines vs. native speech-to-speech models, and knowledge-graph-based conversation memory, translating findings directly into the platform roadmap.
- Built the **agent evaluation framework** from scratch: versioned test-case suite, adversarial "antibot" prompts, and a **node-level scoring rubric** surfacing which workflow nodes agents most frequently skip across test-call batches, closing the loop from failure-frequency analysis to prompt and flow fixes.
- Built an **integrated knowledge-base and knowledge-graph management system** for agent grounding: document ingestion, entity and relationship extraction, versioned KB updates, and retrieval at answer time, letting non-technical tenant teams own their agent knowledge and cutting off-policy responses.
- Run **sprint planning and delivery across a 50-person engineering org**, enforcing a problem-statement → solution-definition → measurable-outcome cadence.

Zomato (Eternal Ltd.) | Generalist, Product (Consumer & Monetization)

Mar 2025 – Dec 2025 · Gurugram

- Shipped a **GenAI agentic conversational voice bot** for rider onboarding and support, handling policy education, earnings clarity, and issue resolution autonomously; reduced onboarding friction, support ticket volume, and time-to-first-delivery.
- Introduced "Near & Fast" and **ETA-driven ML ranking** across homepage, search, and listings, optimising jointly for delivery distance, real-time ETA, and rider density; **+4.5% menu-to-cart conversion**, lower rider idle time, better batching efficiency.
- Created a **new breakfast and coffee category (0→1)** on the Zomato app: use-case-led supply strategy, catalogue, and a dedicated discovery surface, built with major national brands (Starbucks, Blue Tokai, Third Wave Coffee); **+42% category orders**, +30% morning-hour engagement.
- Built automated in-app ad assets powering merchant promotions; **₹22-25 Cr/month** incremental monetization revenue. Redesigned promo and bank-offer journeys homepage→cart for **+11% CTR, +18% redemption**.

Blinkit (Eternal Ltd.) | Product Analyst, B2B Product & Monetization

Jul 2024 – Mar 2025 · Gurugram

- Led the 0→1 integration of **Google Performance Max** with Blinkit Ads, automating ML-driven campaign bidding and optimisation; **cut advertiser activation time by 60%**.
- Built data pipelines and dashboards for ROAS, conversion funnels, and campaign performance; **+22% ad efficiency** via audience segmentation. Launched self-serve advertiser onboarding, cutting TAT from **7 days to under 24 hours** and recovering **45% of previously blocked revenue**.

Zomato (Eternal Ltd.) | Product Analyst, Intern

Jun 2023 – Nov 2023 · Gurugram

- Built **recommendation pipelines and chatbot features** in Python using internal ML tooling; **+5 pp menu-to-cart conversion** and +6% app-open→menu-open lift. Deployed a **dynamic ETA prediction model**: **+12 pp** prediction accuracy, 2.5 min lower ETAs.

TECHNICAL SKILLS

AI / LLM Product: Prompt & context architecture · agentic workflow & tool-calling design · RAG, knowledge-base design & knowledge-graph memory · eval harnesses, rubric scoring & regression suites · red-teaming & guardrails · inference cost/latency optimisation

Voice AI: VAD · STT · TTS · native speech-to-speech · barge-in & turn-taking · dialogue state · concurrency & reliability at scale · observability

Data & Experimentation: SQL · Trino/Presto · Python (Pandas, NumPy) · A/B testing & experiment design · Tableau · Power BI · Java · C++

Build & Ship: Figma · Cursor · Replit · Lovable · prototyping · Jira · Confluence

EDUCATION

Indian Institute of Technology (IIT) Ropar, B.Tech, Computer Science & Engineering · CGPA 8.48

2020 – 2024

ACHIEVEMENTS & LEADERSHIP

Awards: Inter-IIT Engineers Conclave 2022 (1st) · ShARE National Case Challenge, 848 teams (1st) · National Parliamentary Debate (Winner) · SRCC Case Cipher (Finalist). **Leadership & Academics:** General Secretary (elected) · Head, Debate Society · Top 7% Scholarship (x3) · Dept. change EE → CSE (top 7)
